

Handheld Monitors

All monitors are compatible with the full range of Aeroqual gas sensors and can measure ozone, volatile organic compounds (VOC), perchloroethylene, ammonia and carbon monoxide.

Series 200

The Series 200 can be hand held or fixed in position. It is a simple, easy-to-use, low-cost monitor that only displays the gas concentration.

Series 300

The Series 300 can be hand held or fixed in position and provides a high level of functionality & monitoring capability.

Series 500

The Series 500 includes the same features and functionality of the Series 300 but with the added feature of onboard and PC data logging.

Monitors for Fixed Installations

Series 100

The Series 100 ozone controller is designed to be operated as part of an ozone generator control circuit or alarm system.

Series 930

The Series 930 is supplied in an FRP enclosure, has multiple output capability and can be included into a real time network of monitors.

Series 945 (With Temperature and Relative Humidity Sensors)

The Series 945 is supplied in an FRP enclosure, has multiple output capability and can be included into a real time network of monitors.

Networked System Installations

Aeroqual manufacture a range of gas sensor transmitters that can be used in a Networked System Installation. Each sensor has its own identification (ID), which allows a "Daisy-Chained" network to be created utilising either a computer system or PLC.

Applications

Food Sterilisation:	Fresh Produce, Ripening Control, Storage, Preparation, Equipment
Water Sterilisation:	Drinking Water, Waste Water, Wineries & Breweries, Laundries, Aquaculture, Pools & Spas
Horticulture:	Greenhouse Growing, Hydroponics, Storage
Indoor Air Quality:	Casinos, Lounges, Airport Lounges, Hotels, Shopping Centres, Offices
Agriculture:	Chicken Houses, Piggeries, Milking Sheds
Odour Control:	Garbage Disposal, Hotels, Restaurants, Hospitals, Fire Restoration, Eldercare Centres
Outdoor Air Monitoring:	Environmental Monitoring
