

RENZACCI UK PLC

PRESS RELEASE

Issue Date :18th October 2006
Header :RENZACCI'S SM70 AIR MONITORS NOW AVAILABLE
WITH DATA LOGGER

Renzacci UK's best-selling Aeroqual SM70 fixed mounted air monitor is now available with a USB data logger as an optional accessory.

The EL-USB-3 logger from Lascar Electronics comes with PC software that will allow inspection of up to three months' data from a single download. Data can be graphed, printed and exported to other applications.

Designed for simplicity of operation, the user can easily set up logging rate and start time and download the stored data by plugging the module straight into a PC USB port and running the supplied software under Windows 98, 2000 or XP. Individual application modes are indicated by red and green flashing LED lights. The data logger is supplied complete with a long-life lithium battery.

Jason Alexander Managing Director of Renzacci UK plc comments, "This is an extremely valuable addition to the SM70 air monitor allowing full monitoring records to be maintained by the user over a prolonged period of time. Downloads feature five minute read frequencies, 24 hours a day for a period of up to three months – more than 32,500 individual readings.

Drycleaners must ensure that they are meeting the standards of the SED (Solvent Emissions Directive) and operating safe work environments. As with all our monitoring products, the SM70 has been designed to combine maximum efficiency with simplicity of operation and economic purchase and running costs."

RENZACCI UK PLC

PRESS RELEASE

Model SM70 is a fixed monitor and alarm allowing continuous ambient monitoring for Perchloroethylene and hydrocarbon via a large easy-to-read digital display. If accepted gas levels are exceeded the machine emits an audible alarm signal. The unit is designed for simple operation and low maintenance and. An AC power adapter is supplied.

Renzacci also offers a series of handheld monitors, the Series 200, 300 and top-of-the-range 500.
