PRESS RELEASE

Issue Date :6th February 2006
Header :RENZACCI UK ADDS NEW RETANGULAR HOT HEAD LAUNDRY PRESS TO ITS RANGE

The Pony CP-LAV/R1 is the impressive new addition to Renzacci UK Plc's range of finishing equipment.

Fresh to the market for Spring 2006, the automatic press CP-LAV/R1 is the culmination of extensive planning and consultation by Italian manufacturer Pony with its client base around the world. Customer feedback asked for a machine that would finish cottons and linens to the highest possible standards. The result is a, rectangular flat bed hot head laundry press with built in boiler ideal for flatwork including sheets, duvet covers and napkins.

The new Pony CP-LAV/R1 press with head safety guard from Renzacci UK Plc.

CP-LAV/RI has dimensions of 1600 by 1300 by 1400 with the highly polished stainless steel hot head working surface of 1500 by 1200mm and the closing pressure of the head can be preset as can the automatic timer of the head closing.

Pony Automatic Presses are available as the CP or BP range, and not only offer instantaneous steam supply to both the head and buck of the press for the drycleaning range, but also have the vacuum evenly distributed right across the buck.

PRESS RELEASE

Pony CP presses are designed for high volume production while the BP range caters for mid-volume operations. Both models feature a hot air blowing facility from the buck surface if required, and with more than 20 options available for each press allowing a truly bespoke machine.

An automatic head safety guard prevents the operator's hands becoming trapped in the closing head, whilst an additional safety feature on the iron rest stops the head of the buck from being closed until the iron is in place on its rest, preventing the iron from becoming trapped.

Jason Alexander, managing director of Renzacci UK plc comments, "The new CP-LAV/R1 is a fine example of Pony's policy of looking at its ranges and refining the individual pieces of equipment so that there is a solution to every problem thrown at it. As with all our equipment, the CP-LAV/RI has been constructed of the hardest-wearing components with an eye to providing years of trouble-free operation."

Renzacci UK Plc offers a range of finance options and full service agreements for all its equipment.
